sales@peninsulaplastics.com

At Peninsula Plastics, we are committed to providing you with high-quality pallets designed to meet a variety of needs. To ensure optimal performance, it's essential to evenly distribute loads and consider factors such as load configuration, support conditions, transportation, load retention, facility handling, and temperature.

Our guidelines are based on thorough testing and are intended to help you make informed decisions. However, please note that these guidelines are provided for reference only and do not constitute any warranty or guarantee regarding the suitability of our pallets for your specific application. Due to the lack of standardized industry test methodologies and rating criteria, it is crucial that you assess the appropriateness of our pallets for your unique needs. Peninsula Plastics does not assume any responsibility for the performance of our pallets in your specific application; the responsibility for validation and risk lies entirely with the customer.
